FINANCE & IT: FINANCE FOR NON-FINANCE MANAGERS

Overview of course

Our Finance for Non-Finance Managers course is ideal for managers who want to have a better understanding of how the financial aspects of an organisation are managed. On this basic accounts course you will learn elementary accounting principles, understand how the balance sheet, profit and loss account and cash flow statements interact.

By the end of the course you will have an understanding of basic accounting terminology. We will show you how to use Ratios to gain a better understanding of how a business is faring financially to help you make financially informed management decisions.

This course takes place at our Exeter training suite, lunch and refreshments throughout the day are provided. Our workshop sizes are kept to a maximum of 12 delegates to ensure our experienced trainers have time to help individuals understand any complex points.

Who is it for?

Anyone who is in a role where they need to understand how their business is managed financially. This training course is ideal for people who feel baffled by a set of accounts and want to feel more confident when using accounts and gain a basic understanding of financial management.

What will you learn?

You will learn accounting terminology. Why certain things are recorded in a set of accounts and why some things are sometimes left out. You will learn how to use Ratios to gain a better understanding of a company's profitability, liquidity, and solvency and understand how these ratios can help you make investment decisions. You will look at the importance of managing working capital and cash flow, budgeting and looking for trends.
