FINANCE & IT: EXCEL ADVANCED

Overview of course

Our Excel Advanced course is designed for the experienced user of Excel who wants to examine the more advanced and sophisticated features of Microsoft Excel. The aim of this Excel training course is to develop skills in the higher-level data analysis, formula building, formatting and automation features. Macro building is covered but Visual Basic for Applications (VBA) is the subject of a separate course.

You will train on the version of Excel that you use in your office or at home. Our courses are highly practical and interactive. All Open courses take place in our Exeter training suite, we supply laptops for use during the session. We limit the class size to 8 to ensure the tutor has time to deal with any specific queries you may have.

This course will equip you to utilise the advanced functions of Excel and is the highest level of Excel training that we offer as part of our Open training programme – further tuition can be provided, please contact the office for bespoke training details.

We provide training for both PC and Macs. Please contact the office for more details.

Who is it for?

A good knowledge of Excel is required for this programme. Knowledge of spreadsheet design, layout, formatting and automation is necessary. This course is designed for those who want to build on their existing Excel skills and learn the more complicated commands in Excel.

Anyone who has successfully completed our Excel Intermediate course and feels ready to progress their skills will enjoy this workshop.

What will you learn?

You will learn the more advanced functions of Excel enabling you to complete sophisticated tasks in Excel.
